United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Lester D. Johnson, Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SPECIAL ANNOUNCEMENTS

EXPANSION AND CHANGES IN THE U.S. FOREIGN TRADE STATISTICS PROGRAM

It was announced in the August 1966 issue of this report that the Bureau of the Census planned to introduce an expanded and rearranged series of foreign trade statistical publications and tabulations effective with the January 1967 statistics. Under the 1967 program, certain reports currently published will be discontinued. However, for the most part, the discontinued reports will be replaced by reports containing the same or similar data, together with other data not previously available in published form. The new series of reports is intended to provide more useful, timely, and complete foreign trade data. Detailed information concerning the expanded and changing program is presented in a brochure "Guide to Foreign Trade Statistics: 1967." Copies of the brochure are available free from the Bureau of the Census.

ERROR IN COMMODITY DESCRIPTION AND UNIT OF QUANTITY FOR SCHEDULE A NUMBER 055.5065

Effective with the statistics for January 1966 Schedule A number 055.5065 was established as announced in Report FT 125 for July 1966. The commodity description and unit of quantity listed for this Schedule A number in July and subsequent issues of this report are in error and should be changed as follows:

	Schedule A number	Commodity description	Unit of quantity
Reads:	055.5065	Green olives in brine, packed in airtight containers, not pitted or stuffed	Lb.
Should read:	055.5065	Green olives in brine, not pitted or stuffed, whether or not packed in airtight containers	Gal.

It is emphasized that the quantity figures in the statistics reported in Report FT 125 for this Schedule A number for 1966 are actually in gallons and not pounds. Only the description and unit of quantity are in error.

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS

Special reports contracted for on a cost basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. These special reports cover foreign trade data in greater detail or in different arrangement than that available in the regularly published statistics, or supply at an early date information which will be published later. The entire cost of the special work required to compile or duplicate the information from the basic data available in the Bureau is charged to the subscriber.

SPECIAL ANNOUNCEMENTS--Continued

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS— Continued

The reports listed below covering statistics related to import data are those which have been initiated since the last published list. Special reports covering statistics related to other types of foreign trade data are listed in the current foreign trade reports covering such data. Additional subscribers may purchase any special reports listed in any issue. The maximum payment required in each case will be at the rate shown in the list. Unless otherwise indicated, the prices listed cover subscriptions through the end of the calendar year. Where the period covered is less than a full calendar year, the actual period covered is indicated. When more than one user subscribes to one of these reports at the beginning of a calendar year, the cost is prorated among all subscribers. If a new subscriber requests the report during the calendar year, the cost to him in most cases is the same as the cost to each original subscriber.

Cost-sharing arrangements with the original subscribers are sometimes suggested in such cases when the report is a costly one. Information furnished on a cost basis usually will not be publicly released by the Bureau without charge or at a reduced rate until after 6 months, but exceptions are made in the case of data which the Bureau regards as of general interest.

Subscribers who are interested in information which is not obtainable from the regularly published foreign trade statistics reports, and not listed as a special report, may inquire as to the possibility of obtaining the desired information and request a cost estimate for initiating a new special report. The Bureau's policy with regard to services furnished at cost is described more fully in an article entitled "Policy in Regard to Release of Foreign Trade and Shipping Statistics Reports Prepared for Private Organizations on a Cost Basis" which was published in the February 1966 issue of this report. Reprints describing these policies are available upon request to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Inquiries regarding the possibility of obtaining unpublished data, or requests for copies of existing special reports, should also be addressed to the Foreign Trade Division.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics in this report reflect imports of merchandise into the U.S. customs area from foreign countries. The U.S. customs area includes the 50 States, the District of Columbia, and Puerto Rico. Imports into the Virgin Islands (not a part of the U.S. customs area) are not included in the U.S. import statistics, but imports into Puerto Rico from foreign countries are considered to be U.S. imports and are included in the statistics in this report. Shipments between the United States and its outlying possessions (including the Virgin Islands), between the United States and Puerto Rico, and shipments between any of these outlying areas, are not included in the U.S. import statistics. The statistics include both government and nongovernment imports. However, American goods returned to the United States by U.S. armed forces for their own use are not included. Merchandise shipped under customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into U.S. consumption channels; i.e., merchandise released from customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouses for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouses.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carryover of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carryover was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment. Effective July 1965, there was a further increase in the carryover. A change in the procedures for customs verification of statistical information on import entries, effective July 1, results in the receipt of a small percentage of each month's entries at the Census Bureau after the close-out date for that month's statistics.

In general, except for the month when a change in the carryover is introduced, the carryover should have little effect on month-to-month comparisons of overall import totals since the carryover of the previous month should compensate roughly for that of the following month. For smaller segments—country, commodity, and commodity by country totals—there is also some compensation on a month-to-month basis, but comparisons should be made in awareness of the possibility that the figures for a given month may represent more or less than the amounts shipped during the month, especially where the volume of trade is not large.

[1]For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward customs manifest for the vessel).

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from customs custody immediately upon arrival plus merchandise entered into bonded storage warehouses, bonded manufacturing warehouses, and bonded smelting and refining warehouses immediately upon arrival.

Effective with the statistics for January 1966, information on general imports by method of transportation showing imports by vessel, by air, and by all methods of transportation combined are presented in Report FT 350. General import statistics on total trade, trade by commodity, by country, and by customs district are presented in monthly Summary Reports FT 900-I, 930-I, 950-I, and 970-I, respectively. Statistics on the movement of intransit merchandise arriving in or leaving the United States by vessel and summary vessel transportation statistics are contained in Summary Report FT 985 while information on airborne trade, showing shipping weight and value data by selected customs districts of lading and unlading by continent, is published in Summary Report FT 986. Data on trade between the United States, Puerto Rico, and U.S. possessions (not included in this report) are presented in Report FT 800. A more complete description of the coverage and presentation of the statistics mentioned above is included in the specified reports.

SOURCE OF INFORMATION

The source of information for all of the import data included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Customs Officials. Since January 1962, statistical factors of country of origin, net quantity, value, and commodity classification have been verified by customs examiners on formal consumption and warehouse entries. The statistical copy of the entry is corrected by the examiner if he finds that it does not accurately reflect

the information called for by the statistical requirements. Information on warehouse withdrawals which account for approximately 10-percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to education of importers/brokers) by the verification of the warehouse entries to which they correspond. Effective July 1965, imports valued $250 and under are excluded from this verification of statistical data. Prior to July 1965, imports valued under $100 were excluded.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Section 402 and 402a of the Tariff Act of 1930, as amended.

COMMODITY INFORMATION

Commodity Classification

Effective with the statistics for February 1964, the basic import data, which are initially compiled in terms of the commodity classifications in Tariff Schedules of the United States Annotated (TSUSA), are being presented in this report in terms of a rearranged commodity classification system—Schedule A, Statistical Classification of Commodities Imported Into the United States, which is based on the Standard International Trade Classification, Revised (SITC).[2] Schedule A was constructed by the Bureau of the Census in order to provide for the summarization of data for the approximately 10,000 TSUSA classifications into about 2,200 commodity groupings which would be meaningful in terms of commodities important in the U.S. import trade and, at the same time, to provide data in terms of the Standard International Trade Classification outline which are comparable, insofar as possible, to the foreign trade statistics compiled by other trading nations.

A general description of Schedule A and its relation to the TSUSA classifications is presented in a special publication entitled "Changes in Presentation of United States Import Statistics Effective 1964." This publication also contains an outline of Schedule A which shows the TSUSA numbers included in the 7-digit Schedule A codes and gives abbreviated descriptions for the 7-digit classifications and for the 1-, 2-, 3-, and 4-digit levels of summarization. (Complete descriptions for the 1-, 2-, 3-, and 4-digit levels are presented in table 1 of this Report FT 125.) Descriptions at the 5-digit level are not furnished in the special publication since 5-digit summarizations of data are not presented in Report FT 125. However, users may total the data for 7-digit classifications having common first five digits to obtain summaries at the 5-digit level. For the convenience of users who wish to locate individual TSUSA numbers in the new classification system, the above-mentioned special publication contains a list in TSUSA number arrangement showing the Schedule A codes to which the TSUSA numbers were assigned. Further information regarding the SITC, the comparability of Schedule A to the SITC, and the disposition of SITC classifications in Schedule A is also contained in the special publication on changes in presentation of import statistics.

[2]United Nations Statistical Papers, Series M, No. 34, 1961.

The amount and kind of detail in Schedule A was determined on the basis of the estimated magnitude of trade in the various TSUSA commodities arranged within the framework of the SITC. The details of the Schedule A classification system are not considered to be final. Users of the statistics are invited to send comments or requests for changes in classifications to the Foreign Trade Division, Bureau of the Census. Such requests will be given consideration in connection with future modifications which will be made in the schedule.

Presentation of Data in Report FT 125

Table 1 of this report presents value totals for the 1-, 2-, 3-, and 4-digit levels of Schedule A commodity classification. Net quantity and value data for 7-digit Schedule A commodity classifications by country of origin are presented in table 2. Tables 3 and 4 present area by commodity and country by commodity data, respectively, in terms of the 1-, 2-, 3-, and 4-digit classifications. In issues other than the December issue, commodity by country data averaging less than $1,000 per month (on a cumulative year-to-date basis) are grouped together and shown as OTH CTYS (Other Countries) in table 2 while area and country by commodity data in tables 3 and 4, respectively, which average less than $10,000 per month (on a cumulative year-to-date basis) are combined at the 4-digit level only and shown as code 9999, COM AVG UNDER $10,000 PER MO (Commodities Averaging Under $10,000 Per Month).

Availability of TSUSA Data

Information in terms of the 7-digit TSUSA classifications, under which the import statistics are initially compiled, is not presented as such in this report. (A few Schedule A classifications represent individual TSUSA classifications.) However, current monthly statistics in TSUSA number by country of origin arrangement for both general imports and imports for consumption are contained in a machine tabulation, identified as IM 146, copies of which are available for use at Department of Commerce Field Offices in Boston, Los Angeles, New York, Philadelphia, and Seattle, and at the following locations:

Users who wish to do so may obtain data for individual TSUSA parts or subparts in the form of copies of excerpts from the above-mentioned tabulation at a

nominal cost. A sample report which illustrates the content and arrangement of the excerpts, information regarding subscription prices, and an order blank for convenience in placing subscriptions for this special service may also be obtained from the Bureau of the Census upon request.

In addition to tabulation IM 146 mentioned above, information primarily in TSUSA number by country of origin by customs district of entry arrangement is presented in tabulation IM 145, which is on file for reference use at the above-mentioned offices in Washington, D.C. and New York and at the Department of Commerce Field Office in San Francisco, California.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment.

In table 2 of this report, which presents data in commodity by country arrangement, and in table 4, in country by commodity arrangement, countries are presented in the order of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered to be a part of the country for statistical purposes. Schedule C is published as Annex B in Tariff Schedules of the United States Annotated. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

Table 3 of this report presents data on imports from major geographic trading areas in terms of 1-, 2-, 3-, and 4-digit commodity classifications. The areas represent groupings of individual Schedule C countries with the exception of Canada, the United Kingdom, and Japan which are treated as separate areas in table 3. Commodity data for Canada, the United Kingdom, and Japan are not included in table 3 but are presented in table 4 which contains data in country by commodity arrangement. A list showing the major geographic trading areas and the individual countries included in each area appears in the January 1966 issue of this report. Also, following table 4, there is an index of areas and countries which shows the countries included in each area. The country designations UNIDENT in table 2 and Unidentified Countries in tables 3 and 4 are used to reflect imports from countries which could not be identified because of illegible reporting on import entries for low-valued shipments.

ESTIMATED DATA FOR LOW-VALUED IMPORTS

Effective with the statistics for July 1965, data on imports valued $250 and under reported on both formal and informal entries (informal entries, by definition, contain items valued not more than $250) are being estimated from a 1-percent sample. For formal entry shipments, this represents a change from the previous practice of sampling shipments valued under $100. No change has been made with regard to sampling informal entry shipments. The estimates for shipments valued $250 and under are shown under commodity codes 9900000, 9900, 990, and 99 and are excluded from the other individual two, three, four and seven-digit commodity codes. However, these estimates for low-valued shipments are included in the section 9 total, the country and area totals and the total for U.S. imports.

From January 1958-June 1965, data on immediate consumption entry shipments valued under $100 and informal entry shipments (valued $250 and under) were estimated from a 1-percent sample. In addition, effective January 1963, data on warehouse withdrawals valued under $100 were also estimated from a 1-percent sample. The estimates for these low-valued shipments were presented under Schedule A number 9999500 from January 1958-August 1963, under TSUSA number 999.9500 effective September 1963, and under Schedule A number 999.0000 effective February 1964.

(Effective July 1965, data on warehouse entry shipments valued $250 and under are being estimated from a 1-percent sample. From January 1962-June 1965, warehouse entry shipments valued under $100 were sampled. Data on these shipments are not included in the imports for consumption statistics in this report but are included in the general import statistics.)

The statistics for commodity codes from which the low-valued shipments are excluded are undercounted to the extent that such low-valued shipments of the particular commodity are made. Effective with the statistics for July 1965, the total value so excluded generally amounts to less than 2 percent of the monthly import total. Although subject to considerable variability,[3] particularly where the estimated amounts are relatively small, these estimates for low-valued imports may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual areas or countries.

For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. In table 2, which contains 7-digit commodity by country data, the number of documents in the sample is shown by country under commodity code 9900000 in the net quantity columns. In the tables containing data in area by commodity and country by commodity arrangements, figures indicating the number in sample for the current month and the cumulative year to data are shown, respectively, following the description for commodity codes 99, 990, and 9900. The number in sample can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two-times-out-of-three basis.

---

[3]The estimated total for low-valued imports reported under commodity number 9900000 is subject to a sampling variability of 4 to 5 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 4 to 5 percent. The estimates by country under commodity number 9900000 are subject to greater sampling variability—around 13 percent for countries with about 200 low-valued shipments in the sample; around 25 percent for countries with about 75 shipments in the sample; and over 25 percent for smaller sample sizes.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between

[1]The actual value of shipments cannot be less than 1/100 of the estimated amount shown in the report. Figures in this column can be ignored if use of them for a particular total would bring the lower limit below 1/100 of the estimate.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low-valued shipments will generally be less than 9 percent.

The following will illustrate the use of the table:

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line 40-49, one notes the values $111,720 and $138,600. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $199,080 ($310,800 reduced by $111,720) and $449,400 ($310,800 increased by $138,600). Similarly, a country total of $15,957,189 which represents a total of $15,559,689 for the fully compiled data plus an estimate of $397,500 for group 990 based upon 75 shipments in the sample would be between $15,814,389 ($15,957,189 reduced by $142,800) and $16,125,189 ($15,957,189 increased by $168,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

REVISIONS TO THE STATISTICS IN PREVIOUS MONTHS' REPORTS

Corrections to the statistics previously published in the 1966 monthly issues of this report are shown at the back of this December issue. These revisions are reflected in the cumulative January-to-December 1966 statistics presented in the tables in this report.

Under the present revision policy, corrections to the current year's statistics are published in the December report for that year. Corrections to the statistics for the previous year are published in the current year's June report. It is possible that individual exceptions may be made where significant revisions are involved. Corrections for the current year or the previous year which are not published in this report are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) are included as special announcements in current issues of this report and other statistical publications. Copies of such announcements are also attached to reference copies of tabulations where appropriate. Reports providing additional detail compiled but not published can be obtained on a cost basis. For further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.
